### For U.S. Bank (Trust & Investments):

The account values for the Investment and Retirement accounts are determined nightly based on the prices of publicly traded assets at the close of the market on the previous business day. In rare circumstances, prices may be delayed. Publicly traded assets are valued using market quotations or valuation methodologies from financial industry services believed by us to be reliable. Assets that are not publicly traded may be reflected at values from other external sources, or special valuations prepared by U.S. Bank. Assets for which a current value is not available may be reflected as not valued, at par value, or at a nominal value. Values shown do not necessarily reflect prices at which assets could be bought or sold.
